Doctor Speaks Out to Tea and Coffee Drinkers

The "Boston Advertiser" of June 15, 1914. quotes Dr. D. H. Kress, of Chicago, in an address as saying that tea, coffee and cocoa cause more deaths than alcohol.

"These table beverages are sapping the life of our nation. They are making us a race of weak-kidneved, weak-livered beings, unable of expruduce ourselves. The kidneys and liver do not perform their proper functions, and the waste matter left in the system tends to bring on arteriosectrosis.

"Statistics show conclusively that as the con-sumotion of coffee, tea and coosa have increased, the number of nervous diseases and insanity have increased proportionately."

This strong statement from a medical authority cannot be lightly disregarded.

It is easy to prove in one's own case whether tea and coffee cause the frequent "spells" of nervousness, indigestion, biliousness, liver com-plaint, headache, heart disturbance and other ills.

Try quitting both tea and coffee 10 days and use

-then note the difference.

Made from prime wheat and a bit of molasses, Postum is a pure food-drink, entirely free from the pernicious drugs in tea and coffee, or any other harmful substance.

In thousands of homes Postum supplies a table beverage, pleasant to the taste, and to be used freely as a rebuilder, where tea and coffee tear down.

Postum comes in two forms: Regular Postum, must be boiled, 15c and 25c pkgs.

Instant Postum, a soluble form, made in the cup instantly, 30c and 50c tins. Grocers everywhere sell both kinds and the cost per cup is about the same.

LACK THE DIPLOMACY

It has been too plain all through his crisis that Bizmarck is dead! And no German statesman seems to are inherited his sagacity and adroit

The key-stone of his policy was friendship with Russia. That has been frankly abandoned for years, In fact, this new Germany has made the mis-take of challenging the two unbest-able European nations at the same time—Russia and Britain.

It will also be remembered that so soon as the present Emperor ascended the throne, ou the death of his father, he quarreled with Bismarck and drove him out of the Cabiset.

rankty, this advertisement is placed before you to induce you to send, for the Fisher Catalogue. It is impossible in the space at our disposal here, to show good photographs of the two supery Touring Cars on which we are specializing this year. Neither is it our intention to enter into the details of wheel bose; tire sizes, etc. These things, after all, are secondary to pervice, reliability and price.

Lasting Beauty Continuous Luxury Stability

The ideal Fisher demonstration is given in a Fisher that has been in use for three or four years, for thi alone can prove to you the "serviceability," of the car.

A ride in such a car demonstrates its lasting beauty, the continuous luxury of its easy-riding qualities; the stability of the power plant.

A PROPHECY

Sir Robert Borden, in the House of Commons, January 12th, 1910, when discussing the Government policy of naval aid to Great Britain; uttered the following prophery, which was ancered at and ridiculed by Sir Wilfrid Laurier and his followers, who now realize the truth of Sir Robert's utterances:

CANADA S.S. LINES

No Increase in the Price of

Cowan's Perfection Cocoa

To remember our custoffers and the Trade generally in the face of so many advances and rumored advances in the cost of food products, Tea, Coffee, etc., we have decided to amounce definitely that, there will be no advance in price of COWAN'S PERFECTION COCOA, 5-lb., 1-lb., 1-lb., and 10c tins, between now and Christmas. Further than this we cannot look ahead.

We believe it to be the duty of all Canadian Manufacturers to do their utmost during the present crisis to show their belief in the underlying soundness of Canada's commercial conditions. This ammouncement is made in face of the fact that the Cowan Company have had to pay an advanced price for some of their raw materials; but it is believed that increased demand from Atlantic to Pacific, because of falling foreign imports and embargos on teas and coffees, will offset other conditions and enable our lingely increased factory to run full time with full or increased staff at full wares.

The Cowan Company, as manufacturers of an article of unusual food value, are sincered; anxious to do their share in allaying anxiety as to employment, wages and food supplies.

Do You Realize the Food Value of COCOA and CHOCOLATE?

Cocca and Chocolate are foods as staple as flour. Cocca is not a luxury, but a staple necessity of life, and, considered from the standpoint of its value as nourishment in concentrated form pute Cocca at 50c a pound is a most economical food.

The food value of Cocoa and Chocolate has been recognized for many years in Great Britain and Europe. The highest medical authorities have made the statement that Cocoa and Chocolate are the most sustaining of all foods in concentrated form. European soldiers almost universally darp, Chocolate in their kits as an emergency ration in case of food shortage, or fatigue in forced marches, and viewed from this standpoint the late Queen Victoria's gift to her soldiers in South Africa takes, on a new significance.

We all appreciate Tea and Coffee, but, after all is said, these beverages are merely pleasant, alightly stimulating drinks, with little or no food value. "Cowan's Perfection Cocos, on the contrary, is a splendid food as well as drink, and a delightful drink as well as food.

Cowan's Perfection Cocoa is Sold by All Grocers in 5-lb., 1-lb., 1/2-lb., 1/4-lb., and 10c Tins.

HERE'S where we widen the gap between the McLaughlin and all other cars. You—if you think—cannot fail to choose a McLaughlin. You—if you investigate—must admit there is none other like it at the price, You'll be simply captivated by the appearance of the 1915 models—marvels of grace, true exponents of pure streamline beauty. They have all the power and "lug," all the built-in efficiency, of former models—with these important features added:

Some 1915 Improvements New and improved Delco system of electric starting

and lighting; Non-skid tires on rear wheels; Speedometer as part of regular equipment: Tungsten steel valves-valves

of proven efficiency; Carbureter supplied by Stewart-Warner gravity feed vacuum system;

These and many other Improvements

that create efficiency—not at prices advanced (as you might reasonably expect) but at prices substantially lower.

And retaining the power, the speed, the dependability or former McLaughlin models—featuring again the powerful Buick "valve-in-head" motor—emphasizing aftesh the big fact of "greater power with less fault"
